DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 8-9, 12-17, 19-20, 22-30 and 54, drawn to a receiver for receiving video data, classified in class 455, subclass 343.4
- II. Claims 31, 34, 36-38, 40-50 and 52-53, drawn to a transmitter for transmitting video data, classified in class 455, subclass 91.

The inventions are distinct, each from the other because of the following reasons:

Invention I and II are related as combination & subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by it self or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination has separate utility such as the transmitting device may be used in other electronic device for location determination purpose rather than the multimedia device as disclosed in group II.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
